OVERVIEW

The house, designed by Van Dusen Architects of Washington DC, is a large expansion of a house built in the early part of the last century. The design beautifully incorporates the classical form and detailing of the small original house with a very large more modernized addition.

The house has approximately 6500 square feet on four floors with seven bedrooms and seven full bathrooms. It has a screened side porch, rear deck and patio, and a large one car garage with ample storage room. The exterior utilizes a combination of materials such as cedar shingles, vertical siding, and metal roofs to accentuate the multi-textural architectural forms and surfaces of the house. Other Amenities Include:

- 3.5 inch red oak floors on two levels and wall to wall carpet on two levels

- Locally built painted kitchen cabinets and bathroom vanities
- Porcelanosa tile in all the bathrooms and kitchen back splash
- An original wood burning fireplace and a new gas fireplace
- Built in shelving on the main level
- Grohe, Toto, and Kohler bathroom fixtures
- LED lighting including over one hundred recessed and dimmable fixtures
- Four zone heating and air conditioning, each floor individually thermostatically controlled with Wi-Fi capabilities
- High efficiency Goodman furnaces, air conditioning condensers, and hot water heater
- Sound insulation in all bathrooms and master bedroom
- Pre-wire in each room for Wi-Fi, television, data access and phone
- Media room and family room pre wired for surround sound
- Thermador kitchen appliance set with six burner cook top,

microwave drawer and 48 inch refrigerator/freezer

- Caesar Stone kitchen counters and vanity tops
- Stone patio and walkways
- Complete spray foam insulation with REM design that exceeds building codes
- Recirculating hot water system for instant hot water on all floor levels
- Combination of architectural shingles and metal roofs
- New one inch copper water service
- Pervious driveway paving
- Custom made exterior metal deck railings
- Overhead fan capabilities in all the bedrooms and 3rd level common area
- All windows and exterior doors are high efficiency with Low-E 366 annealed glass
- New underground four hundred ampere electrical service and new underground telephone and cable
- Ample storage areas throughout the house
- The property will accommodate a pool in the rear yard
